#### ABSTRACT

With the changing paradigm of information seeking pattern of researcher scholars, Academic Social Networking Sites (ASNSs) offer new ways to communicate, collaborate and gather knowledge. ASNSs bring researchers and researches at one place. Flexibility in exchange of ideas and open discussions lead to free flow of information. This paper provides insight of few ASNSs and what they offer to students and research scholars. ASNSs help scholars in research and learning, find popular topic, collation of resources, collaborative and peer-to-peer learning.

**A study on the awareness of copyright towards digital content among users PTAR, UiTM Puncak Perdana**

Authors: Hazlin Ibrahim Khan

Publication date: 2015

Institution: Universiti Teknologi MARA

Description: The advent of digital libraries today has been mired with several aspect including the development of appropriate technologies, issues related to storage, right management and so on. With the application of technologies in digital libraries, process of digitization can easily done, the increasing of storage capacity and the improving quality of accessing the materials or information. However, just as digital technology creates new opportunities for library user to have convenient access to massive library digital content, this technology at the same time helps open the possibility of user's problematic behaviour, such as massive downloading or even copyright law violation. The purpose of this study is to identify on the awareness of copyright and investigate the factor that contribute to the awareness of copyright towards digital content among users PTAR, UiTM Puncak Perdana. To achieve the research objective, quantitative method were use to get the feedback from respondent. Overall, 256 respondent involve in answering questionnaire, then analysed using SPSS software to show the possible correlation between dependent and independent variables selected in study. In addition, SPSS is the most common methods used in order to analyse findings for quantitative data. From the findings, it shows that three factors have a major/significant influence on the awareness on copyright towards digital collection namely policy guidance, promotional programs and training. Finding also shows that three factors discussed in this study have a relationship and contribute to the lawful attitude of respondent. In general, the findings can conclude that for PTAR, UiTM ...
