WEB OF SCIENCE RESEARCHER ID?

- A *Web of Science* Researcher ID is a unique identifier that connects you to your publications across the *Web of Science* ecosystem (e.g., *Web of Science*, and *InCites*) and provides the global research community with an invaluable index to author information.
- If you have previously utilised Publons with your Researcher ID, **Publons has now been integrated with your *Web of Science Researcher Profile*** and you will be redirected to WoS for access.

PUBLONS PROFILE MOVING TO WoS

[View online](#)

Your **Publons** profile is moving to the Web of Science

Dear Hazlin,

Since launching **Publons**™ in 2012, we have expanded our mission. Building upon our commitment to help you get credit for peer review, we are also committed to helping you gain recognition for more of your contributions to scholarship throughout your career. That's why we currently offer you the option to display your publications and citations from the Web of Science Core Collection™ alongside your peer reviews and editorships.

After integrating with the Web of Science™ in 2019, we received many requests from users who access the Web of Science through their institution to improve the way the tools work together. Listening to community feedback has guided our development since day one, and to meet the needs of researchers like you, we will be moving **Publons** profiles into the Web of Science in April 2022.

When your profile moves to the Web of Science, you will be able to:

- **Get noticed by funders and potential collaborators**
Your profile will be discoverable in a trusted database used by over 15 million researchers at more than 9,000 institutions worldwide.
- **Gain recognition for your open peer reviews**
Your open peer reviews will display on article records in the Web of Science, with a link to your profile.
- **Continue to use your profile as usual**
There will be no interruption in service, and you'll find the same useful features that help you keep track of your verified peer reviews, editorships and publications.

That's why we currently offer you the option to display your publications and citations from the Web of Science Core Collection™ alongside your peer reviews and editorships.

Your Publons profile is moving to Web of Science since April 2022.

New features

- You'll be able to manage your profile and edit your details easily from just **one platform** rather than two.
- You'll receive an **automatic alert** when someone cites a publication from your profile indexed in the Web of Science Core Collection.
- Your profile will be visible in a database used by 15 million people in over 9,000 institutions around the world.

FAQs

- Will researchers' profiles continue to be public following the move to WoS?
Your profile will remain freely available for anyone to see, so people without a subscription to WoS will still be able to look you up. However, they won't see entries from authors or documents you haven't claimed.
- If I don't have publications on WoS, can I have a Web of Science ResearcherID?
Yes, you can have this unique identifier.
- Will I still be able to add publications that aren't in WoS to my profile? *Yes.*
- Will I still be able to sync my WoS profile with my ORCID iD? *Yes.*

INDEX AND NOT INDEXED

Researcher Profiles now display publications not indexed in the Core Collection

Web of Science Researcher Profiles can now display publications researchers have added to their profile that are not indexed in the Core Collection. By default, the Publications tab only displays those publications indexed in the Core Collection, but users can now click a checkbox to include other publications chronologically as part of the same list. The number in brackets shows how many publications can be included.

Publications not indexed in the Core Collection are identified in the list with a 'Not indexed' badge, and their citations are not tracked. The metrics on a researcher's profile (e.g., sum of times cited, h-index) are only calculated on their publications in the Core Collection.
